Jason,

I mapped in three pivots with combined acreage of 318 acres. I believe we can pick up an additional 25 or so acres if we use a corner machine of the larger (full circle) pivot.

I would need to see the land to make sure of the elevation and if the woodland can be removed. this gives us a starting point but majority of the land can be irrigated.

let me know what you think???

thanks

Jody

Good Afternoon,

Jason asked me to send over this map for a property he has listed for sale. He wanted to know if you could make a map of where the potential pivots could go.

Thanks,  
Jessica Brannen
